

## ZADATAK

Napravite jednostavnu WindowsForms aplikaciju koja omogućava:

- prikaz žanrova (**Genre**),
- prikaz knjiga (**Book**) za odabrani žanr,
- unos nove knjige za odabrani žanr (**Add book**),
- brisanje postojeće knjige (**Delete book**).

Nakon dodavanja ili brisanja zapisa, grafičko sučelje treba osvježiti. **Zadatak treba riješiti upotrebom Entity Framework-a.**

The screenshot shows a Windows Forms application titled "Books". It has a "Genre:" section with a table showing 3 rows (Id, Name). The first row is selected. Below it is a "Books:" section with a table showing 3 rows (Id, Title, NumOfPages, MainAuthor). The first row is selected. To the right of the "Books:" table is a "Book:" form with fields for "Title:", "# of pages:", and "Main author:". There is an "Add book" button next to the "Title:" field and a "Delete book" button at the bottom right of the application.

Podaci se nalaze u tablicama **Books** i **Genres**, u bazi podataka **EF\_DB** na **Serveru** (31.147.206.65). Podaci za spajanje su user id=**student**;password=**student** Tablice u bazi imaju sljedeću strukturu:
